

WICKED

FOR GOOD

IN THEATERS NOVEMBER 21

THE MAGIC OF COLLECTIVE ACTION!

As with every character in *Wicked: For Good*, our choices have consequences and can make a difference, good or bad, to the world and people around us. Every step we take can inspire others and help clean the air, keep our communities healthy and safe, and protect the planet's magic for generations to come.

HERE ARE A FEW HIGH-IMPACT ACTIONS TO TAKE FROM RARE!

Choose Green Transportation

Elphaba grabbed a broomstick, and Glinda a floating bubble. We can carpool with friends, ride bikes, switch to hybrid or electric cars, or join our neighbors in taking public transportation to school and work.

Switch to Green Energy

Harness the energy of the sun with solar panels on your home or support community solar initiatives. We can also replace gas appliances with electric alternatives such as induction stoves and heating/cooling tech such as heat pumps.

Green-ify Your Meals

Plant-based meals are delicious and filling – and can have a lighter footprint, especially when buying local produce. You can start small – even one or two days a week of eating greener can make a big difference.

Reuse and Repair: Green What You've Got

Before buying something new, consider thrifting, swapping, repairing, or reusing what you already have. Extending the life of clothing, furniture, and everyday items keeps waste out of landfills and our communities.

Learn more from Rare [here](#).

The magic grows when we all cast the spell.
